

# Sara Corbett

## Died Age 16

### Methadone

Sara was a beautiful 16 year-old girl going through the challenges most 16 year-olds go through. She made one very bad decision to take methadone on August 7, 2004. By August 8th, her decision had cost her life and I lost the most precious person in my life.

There isn't a moment in any day that I am not thinking of my beloved daughter. She would have been 18 next on April 25, 2006. It just breaks my heart not having her here. She left behind a 3 1/2 year old sister that asks about her

almost everyday.

I am constantly asking myself what I could have done to prevent such tragedy. She was my life and now she is gone. I can not stress how much she is missed. She was a beautiful person. The world seems like such a cold place without her. I miss her dearly.
