

Benjamin James Croman

Died Age 26
GHB

My son, Benjamin James Croman, died on September 1, 2000 after a 3 year battle with the drug GHB. He ended up committing suicide as a result of this drug. He was 26 years old.

I lost this wonderful, loving, caring human, living, breathing young man because his depression was so bad he didn't want to live.

My life will never be the same without him.

Diane Bianconi (Ben's Mom)
