

Bryan Eckman

Died Age 20

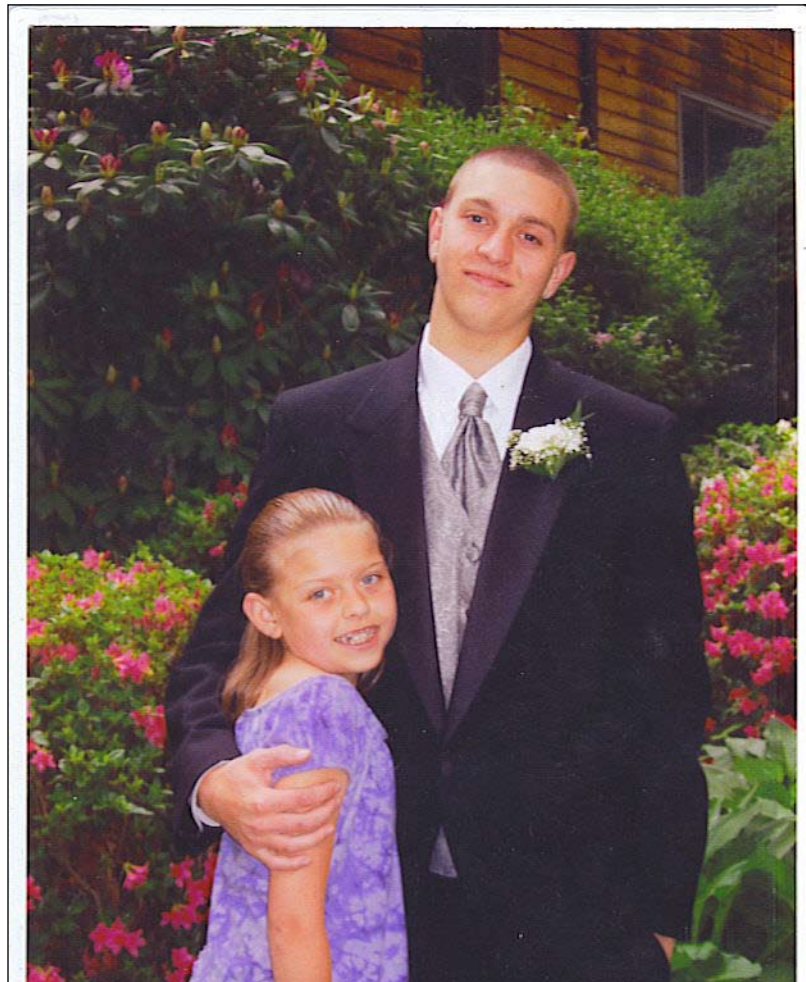

Drug Overdose

Bryan Eckman was 20 years old when he died on August 11, 2005. His mother was on vacation with her daughter. Bry died at home alone (his dad didn't live at the residence) with four kids he was partying with.

Bryan is survived by his older brother, Philip (age 23) and sister, Chrissy (age 11).

Although it seems like Bryan's destiny and purpose were cut short by his early death, the promise to stand fast and intercede from heaven with Jesus has not been lost, for he is mighty and powerful in his resurrected state.

~ Linda Eckman
